

# Technology Tidbits

## IN THIS ISSUE

Be an IT hero

**SOLID STATE TECHNOLOGY**  
impacting business IT environments

**LATYSIS**  
Lewan featured partner

As our IT environment grows more complex, the end-user community requires faster, more reliable access to information, and with business budget cuts, IT must constantly adapt. Solid State Drive (SSD) Technology and managed data center services are two topics that will continue to be valuable to IT organizations, so we have included some of the latest information about these topics. We have also included a link to an informational webcast from Gartner to help you make an impact.

## **Webcast – Gartner – Be an IT Hero: Proven Approaches to Efficiency** [View the Webcast](#)

How can IT departments today deal with **shrinking budgets and increased demand for applications, storage space, mobility, reliability, etc.?** This is a great high-level webcast from Gartner that shows how to address these issues and keep IT looking good to the business.

## **Good (and quick) Reading – NY Times – Solid State Drives Get Warmer Reception from Businesses**

The New York Times recently ran a short [article](#) discussing how Solid State Technology is making an impact on business IT environments. We now have the ability, along with with our partners [Fusion IO](#), [Compellent](#) and [EqualLogic](#), to provide Solid State Technology **support for your most IO intensive applications**. If you are looking at this technology, we have some great information to share with you about how to harness the power of SSD.

## **Featured Partner – Latisys**

[Latisys](#) (formerly Data 393) has the ability to support organizations requiring a **cost-effective solution for facilities and infrastructure**. With Tier 3 data centers in California, Colorado and Illinois, Latisys can provide enterprise level products and services for **data center space, hosting and managed services**. If you have requirements that have been too costly or complex to address in the past (**DR, virtualization, archive, security, etc.**), let's schedule a data center tour and talk about how Latisys might fit into your plans.

*We manage your technology, so you can manage your business*
